faisalyaseen00

faisal-yaseen

SUMMARY

Full Stack Developer with hands-on experience building scalable web, mobile, and backend systems. Skilled in end-to-end application development using the MERN stack, Flutter, Node.js, and Next.js. Experienced in designing RESTful APIs, integrating AI-powered features, implementing secure authentication systems, and shipping production-ready applications across mobile and web platforms.

SKILLS

Frontend:	React.js, Next.js, HTML, CSS, JavaScript
Mobile:	Flutter, Dart, Firebase, FCM, Android
Backend:	Node.js, Express.js, FastAPI, Flask, REST APIs
Databases:	MongoDB, MySQL, Firebase Firestore
Tools & Cloud:	Git, Docker, Postman, n8n, OAuth 2.0
Languages:	JavaScript, Python, Dart, C++, SQL

PROJECTS

Full Stack E-Commerce — Stationary Hub

github.com/faisalyaseen00

Built with MERN Stack (MongoDB, Express, React, Node.js). Developed a complete e-commerce platform with product management, shopping cart, order handling, and secure user authentication. Designed RESTful APIs and integrated the React frontend with Node.js backend services end-to-end.

Sentinel AI — Cross-Platform Mobile Application

github.com/faisalyaseen00

Built with Flutter, Node.js, Firebase, and n8n. Built an AI-powered personal assistant mobile application featuring automated backend workflows, persistent memory architecture, intelligent intent classification, voice support, and Firebase authentication with real-time data sync.

AI-Powered Phishing Detection Web Application

github.com/faisalyaseen00

Built with React, FastAPI, Selenium, OCR, and MongoDB. Developed a full-stack web application for phishing detection, analyzing websites using visual similarity, DOM structure analysis, OCR-based brand detection, and multi-layer AI security classification in real time.

Full Stack Dashboard & API Applications

github.com/faisalyaseen00

Built with Next.js, React, Node.js, and MongoDB. Developed multiple full-stack web applications including admin dashboards and API-driven systems. Implemented authentication flows, database integration, and responsive UI design across projects.

Android Mobile Applications

github.com/faisalyaseen00

Built with Flutter and Firebase. Developed mobile applications featuring authentication, push notifications (FCM), real-time data synchronization, and clean UI-driven design with backend integration.

Secure Chat Application

github.com/faisalyaseen00

Built with Python, RSA, and Diffie-Hellman cryptography. Developed an encrypted client-server chat system implementing end-to-end encryption with RSA key exchange and secure messaging protocols.

Smart Gmail Filter & Notifier

github.com/faisalyaseen00

Built with Python, Gmail API, and OAuth 2.0. Built an intelligent email classification and notification system using Gmail API integration with AI-based priority filtering and automated workflow triggers.

EDUCATION

Ongoing	BS Cyber Security Relevant Coursework: Artificial Intelligence, Intelligent Systems, Data Structures, Algorithms, Software Engineering, Machine Learning, Cryptography, Networking	FAST-NUCES, Islamabad
2023	Web Development Course Completed full-stack web development training covering backend systems, databases, frontend integration, and end-to-end web application development.	eHunar
2023	Cyber Security Professional Certificate Completed intensive cybersecurity training focused on security operations, networking, system defense, and application security fundamentals.	Google

EXPERIENCE

2026	AI-Driven Application Developer Intern Pro Tech Lab • Developed and contributed to AI-powered full-stack web applications and automation systems. • Built backend APIs and integrated intelligent workflows into production applications. • Worked on phishing detection platform including frontend UI, backend logic, and API design. • Assisted in API testing, integration, and backend security operations using Postman. • Collaborated on research-oriented development tasks involving AI and application development. Full Stack / API Development / AI Integration
2025	Vice President FAST Computing Society • Led technical event management, development-focused workshops, and society operations. • Coordinated teams, speakers, sponsorship communication, and execution planning. • Organized AI, software engineering, and application development related activities. Leadership / Management / Coordination
2025	Vice President — Logistics NASCON 25 — FAST University's Flagship Tech Event • Managed operational logistics and execution workflows for one of Pakistan's largest student-led technology events. • Coordinated vendors, technical teams, event operations, and large-scale execution management. • Assisted in planning and managing high-volume event activities and technical competitions. Operations / Leadership / Execution
2023 – 2024	Vice Head — Information FAST Community Service Society • Led communication management, outreach coordination, and information dissemination activities. Communication / Outreach
